EXPERIENCE

Contract Developer

2021

Hause of Brands | Los Angeles, California | <https://www.hauseofbrands.com>

Responsible for all website development utilizing MongoDB, Express, React, NodeJS, and AWS. Directly automate work-flow between customer and admin in a vehicle wholesale remarketing environment:

- Constructed responsive UI components via React concepts such as React hooks and JSX patterns while utilizing front-end and backend libraries
- Each action included on the user's registered account such as adding or editing a vehicle listing is notified via EmailJS to the admin's email. The user also has access to helper components such as downloading CSV files that contain information on the listings they have recorded so far
- Built algorithms, API, and endpoints that would allow the ability to edit any user account and/or vehicle listings, change listing status, and view the history of vehicle listing changes edited by users sorted by date
- Implemented pagination by coordinating with server-side code that allows client information to request the data in the form of groups
- Utilizing useContext to teleport data into deep component trees when passing the state through properties would not be possible
- Worked closely with clients by having weekly sprint(s) discussing progress and planning the next milestone for the website
- Designed NodeJS back-end through Express and MongoDB while maintaining security information with JSON web tokens
- Deployed back-end with Docker container running in AWS EC2

PROJECTS

Portfolio | <https://maherhalabi.com>

2021

- Developed a website showcasing my experiences and projects using Gatsby
- Streamlined deployment process with Git
- Deployed using AWS S3 Bucket, Cloudfront, and Route 53
- Secured website with AWS Certificate Manager

EDUCATION

California State University, East Bay | Bachelor of Science in Computer Science Expected May 2022

- GPA: 3.5/4.0, Dean's List for 2 semesters

TECHNICAL SKILLS

Javascript | React | Gatsby | MongoDB | Mongoose | Express | CSS3 | Sass | Material-UI | Bootstrap | NodeJS | Express | AWS | Docker | NPM | Yarn | Git | Webpack | Algorithm Design & Analysis | HTML5 | SQL
