Education

Bachelor of Science, Computer Science	Graduating Spring 2022
California State University East Bay, Hayward, CA	GPA:

Experience

Contract Developer	January - June 2021

- *AWS CLOUD*

- Automate the exchange of vehicle listing information between dealerships and a wholesale remarketer using.

- Expanded from Material-UI table component and went from there

- Manage the designing, building, and configuring website

- Develop creative solutions for automating deployment, configuration, and verification of legacy or early stage technology to cloud environments to support continuous integration of container-based applications.

- Led the design vision to allow easy navigation and visitor friendly design while maintaining a professional look. Visual styles and interface design.

- Used github

- Implement an automatic mailing system to act as notifications for every action taken between either user or admin with the help from libraries EmailJS and nodemailer.

- Deployed full stack project using Docker container and AWS services EC2, S3 Bucket, Cloudfront for better performance using remote website caching, Route 53 to reroute custom domain in order to work with other IP Addresses.

- AWS certificate manager and EC2 Load balancer to allow SSL for both ec2 and s3 bucket.

- Talk to client communication

- Monitor the infrastructure programming baseline code via the GitFlow process

- Worked with React, Node.js, MongoDB, Express, AWS, Docker,
